Full-stack engineer with 6 years of experience in system design and delivery across React, Next.js, TypeScript, Node.js, NestJS, and SQL/NoSQL databases, backed by a DevOps foundation in Docker, CI/CD, and AWS Certified Solutions Architect.

EXPERIENCE

Software Engineer - Bespoke Motor Group | New York, United States | April 2026 - Present

- Platform engineering for a 50-person dealership group operating Bentley, Rolls-Royce, Lamborghini and Porsche franchises.
- Led the system design and delivery of an in-house market intelligence platform featuring an ETL pipeline that scrapes and processes 50,000+ vehicles weekly, surfacing insights on pricing, regional dominance, and model market share.
- Architected a local-first inventory eCatalog PWA with React, used daily by 25+ sales agents on showroom iPads, persisting inventory to IndexedDB for instant in-memory filtering and syncing every device through a shared Server-Sent Events stream.
- Built scalable REST APIs with NestJS, Node.js, and PostgreSQL powering inventory management and inventory syndication across the Dealer Management System, secured via Microsoft Entra ID (SSO).
- Developed responsive marketing websites for the Bentley, Rolls-Royce and Lamborghini brands with Next.js, HTML/CSS and Payload CMS, using server-side rendering for page performance and SEO visibility.

Software Engineer (Part-time) - BudgetBuy AI | Melbourne, Australia | June 2026 - Present

- AI-powered lead-capture SaaS for Australian SMBs, processing 5,000+ monthly interactions across voice and chat channels.
- Architected a multi-tenant service based platform featuring Stripe subscription billing, a RAG pipeline on PostgreSQL with Edge Functions for document ingestion and vector retrieval, and N8N workflows with OpenAI agents.
- Engineered a security-hardened API gateway in Express.js/TypeScript, enforcing tenant isolation via Row-Level Security and JWT authentication, while handling 100k+ daily requests and plan-based quotas.

DevOps Engineer - Maya Hive | Colombo, Sri Lanka | January 2022 - March 2026

- Full-stack delivery and ownership of platform engineering within a seven-person Agile product team.
- Architected a multi-tenant CRM with Laravel, PHP and REST APIs supporting 6,000+ weekly leads across client tenants.
- Engineered a Delivery Management System for JAT Holdings PLC with route optimization to handle 200+ daily deliveries.
- Integrated Stripe, PayHere, Cybersource, WEBXPAY and MPGS payment gateways across PCI-sensitive checkout flows.
- Designed scalable data architectures using SQL/NoSQL databases such as MySQL and MongoDB.
- Architected secure Linux environments using Ansible and Docker, integrated GitHub Actions CI/CD.
- Maintained 99.7% uptime SLA and Disaster Recovery (RTO/RPO) via SRE-focused Grafana and Prometheus observability.

Web Development Intern - Maya Hive | Colombo, Sri Lanka | September 2021 - December 2021

- Contributed to client projects leveraging CMS features to create personalized and dynamic websites.
- Built responsive WordPress sites with PHP, HTML, SASS and JavaScript, managing code in Git within Agile sprint cycles.

HaXmas Hackathon - Rotaract Club of IIT | September 2021 - December 2021

Secured 2nd place for ReClima, an SDG aligned mobile strategy game built on Unity Game Engine using C# scripting language. Led level design and core game mechanics within a 5 member team to successfully launch an MVP.

CERTIFICATIONS

AWS Certified Solutions Architect - Associate (SAA-C03) 2026

Designed and deployed high-performance and cost-optimized distributed systems on AWS, experience in architecting secure multi-tier infrastructures using EC2, S3, RDS, IAM and Lambda.

EDUCATION

BA (Hons) Visual Communication Design - Limkokwing University of Creative Technology 2018 - 2022

GCE Ordinary Level - S.Thomas' College, Mount Lavinia 2007 - 2017
